Supply Chain Management

Core Skill 1

Demand & Supply Planning

Brings together demand forecasting, supply planning, inventory, production and distribution decisions to improve availability, service levels and working capital

ALSO KNOWN AS

- Supply Network Planning
- Inventory & Forecast Planning
- Integrated Demand & Supply Planning

Past Projects Delivered - Examples

Role:

Supply and Operations Manager Consultant

Client:

Leading E-commerce Platform for Baby Products

Deliverables:

- Managing end-to-end supply chain operations across procurement, factories, warehousing, and logistics in India and international markets
- Building data-driven demand forecasting and inventory planning systems to improve supply continuity and reduce stockouts
- Driving AI-led automation across fulfilment and e-commerce operations, coordinating dispatches and SLAs across major marketplaces

Role:

Supply Chain Planning Consultant

Client:

Leading Food & Beverages company

Deliverables:

- Analysing demand, inventory, and supply trends to improve forecast accuracy, optimise stock, and maintain service levels
- Managing demand, supply, production, and distribution planning to strengthen end-to-end supply chain performance
- Building data-driven dashboards and insights while partnering with Manufacturing, Procurement, Logistics, Commercial, and Finance teams

Supply Chain Management

Core Skill 2

Manufacturing & Operations Transformation

Improving manufacturing, warehouse and supply chain operations through process redesign, productivity improvement, standardisation and stronger operating models

ALSO KNOWN AS

- Manufacturing Excellence
- Operations Improvement
- Operational Excellence
- Supply Chain Transformation

Past Projects Delivered - Examples

Role:
Manufacturing Excellence Consultant

Client:
Indian Business Conglomerate

Deliverables:

- Assessing manufacturing performance across 10+ contract manufacturing sites producing potato chips and extruded snacks
- Identifying yield, wastage, and process-loss opportunities across manufacturing operations to improve efficiency and reduce costs
- Developing site-level improvement plans and standardising operating parameters, SOPs, KPIs, and best practices across manufacturers

Role:
Supply Chain Transformation Consultant

Client:
BU of a Fortune 500 Company

Deliverables:

- Designing future-state supply chain and manufacturing processes across planning, logistics, transportation and plant operations
- Defining RACI, KPIs, controls and governance to improve operational clarity, accountability and performance
- Leading transition and rollout across five business units, tracking service levels, savings and efficiency improvements through go-live and stabilisation

Supply Chain Management

Core Skill 3

Procurement & Strategic Sourcing

Managing sourcing strategies, supplier selection, negotiations and procurement processes to improve value, control spend and strengthen supplier performance

ALSO KNOWN AS

- Strategic Sourcing
- Direct & Indirect Procurement
- e-Sourcing
- Supplier & Vendor Management

Past Projects Delivered - Examples

Role:
Indirect Procurement Consultant

Client:
Multinational Consumer Products Company

Deliverables:

- Developing and executing sourcing strategies across Marketing, Media, HR and Professional Services categories
- Leading RFIs/RFPs, supplier negotiations, spend analysis and vendor management to drive savings and improve commercial outcomes
- Strengthening procurement governance, supplier performance and eSourcing processes, while aligning global and local stakeholders

Role:
eSourcing Specialist

Client:
Global Confectionery and Pet Food Manufacturer

Deliverables:

- Managing end-to-end eSourcing and eAuction events, from bid setup and supplier participation through evaluation and award support
- Supporting buyers with bid validation, negotiation scenarios and sourcing-event design across multiple categories
- Capturing sourcing outcomes and insights to improve savings visibility, supplier decisions and sourcing best practices

Supply Chain Management

Core Skill 4

Finance, Analytics & Systems

Using finance, analytics and digital systems to improve supply chain visibility, cost control, performance tracking and decision-making

ALSO KNOWN AS

- Supply Chain Analytics
- Spend Analytics
- Cost & Performance Analytics

Past Projects Delivered - Examples

Role:
Spend Analytics Product Owner

Client:
Global Confectionery and Pet Food Manufacturer

Deliverables:

- Leading optimisation of a global spend management platform, aligning capabilities with procurement priorities
- Managing vendor delivery, taxonomy, mappings and system integrations across a global organisation
- Driving adoption, data governance and cost-saving insights through stakeholder engagement and training

Role:
Supply Chain Finance Consultant

Client:
Leading Global Consumer Products Company

Deliverables:

- Analysing logistics and production costs through dashboards, variance analysis, forecasting, and actionable financial insights
- Supporting SAP S/4HANA transition across finance and supply chain processes
- Managing product and SKU costing, BOM analysis, inventory accounting, and integrated finance processes across procurement, production, and sales
